Things to go wrong

- separate the wrong emails by accident
- Filters out important emails
- leaves unimportant emails in
- Deletes all emails

How it works

- business emails seperated
- User registration
- Individual users are prioritized
- accept higher priorities for work or things of interest

Possible features

- create personalized tabs, work tab has work emails, personal has other users and work
- Pop up menu, asking about certain emails to keep or discard
- Block button built in
- Unsubscribe from unnecessary sites like stores or ads

Price?

- Depends on the number of emails one has
- Possible monthly subscription
- adds to cover price - free
- Free trial before buying premium

Advertisement

- Ads on Youtube
- Social Media

Future Business

- extension for google
- Used for documents too, docs, word.
- could develop to be added to other programs sites
